ABOUT ME

A motivated and detail-oriented student with a strong interest in technology, programming, and digital solutions. Developing foundational skills in programming, web development, and problem-solving through academic projects and practical activities. Demonstrates creativity, adaptability, and a willingness to learn new technologies and skills. Committed to continuous improvement and contributing positively to professional and collaborative environments.

EXPERIENCE

July 2023 to Present

System Administrator • Clark College of Science and Technology

I have developed a secure academic portal for accessing student records and implemented a library management system with book reservation features. Additionally, I troubleshoot and resolve technical issues for computers, optimize performance, and minimize downtime. I also maintain three computer labs, ensuring equipment is up-to-date and operational.

2024 to Present

College/SHS Instructor • Clark College of Science and Technology

Provide instruction in programming and technology-related subjects to College and Senior High School students. Develop instructional materials, assessments, and practical activities while supporting students' technical and academic development.

PROJECTS

CCST Student Portal and Enrollment System

Developed a web-based school management system using Laravel, PHP, and MySQL, supporting both school operations and TESDA-related processes. Features include online registration, student enrollment, grading and grade monitoring, student records management, role-based access for students, teachers, and registrars, automated tuition fee calculations, and automatic generation and printing of student documents and academic records.

Library Book Reservation and Management System

Developed a library management system with book inventory tracking, book reservations, borrower records, book availability monitoring, overdue tracking, and report generation to improve library operations.

CCST's Official Website

Developed and maintained the school's official website, featuring school information, announcements, academic updates, and other essential resources to improve communication and provide easy access to school-related information.

CCST's Inventory Management System

Developed a centralized inventory system for multiple school departments to manage equipment, supplies, and other resources, track stock quantities and item records, monitor inventory movements, and generate reports for improved resource management and accountability.

CERTIFICATIONS AND SEMINARS

- **Computer Systems Servicing (CSS) NC II** – TESDA
- **WordPress Seminar** – Website Development and Content Management

TECHNICAL SKILLS

- **Programming Languages**: PHP, JavaScript, Python, C#, C++
- **Web Development**: HTML, CSS, Laravel, WordPress, Django, .NET
- **Database Management**: MySQL, Database Design and Management
- **Software and Tools**: Visual Studio Code, Visual Studio, NetBeans IDE, Microsoft Office, Adobe Photoshop, Git, GitHub
- **IT and Technical Support**: Computer Hardware and Software Troubleshooting, Operating System Installation, Network Configuration, Computer Laboratory Maintenance, System Administration

EDUCATION

2021 - 2023 **Associate in Computer Technology**
Clark College of Science and Technology

2019 - 2021 **Information and Comunication Technology**
Dapdap High School
